

WHITE PAPER

CZ Terminal Token

\$CZT

The Terminal for Opportunity. The Token for the Future.

TOKEN SUPPLY	NETWORK
500,000,000 \$CZT	BNB Smart Chain (BSC)

A community-driven BSC utility token featuring staking, holder rewards,
and a deflationary burn model.

1. Executive Summary

CZ Terminal Token (\$CZT) is a community-driven utility token designed with a fixed supply, reward-based holder incentives, staking options, and a deflationary burn model. The project's objective is to create a simple but scalable token ecosystem that supports long-term participation, loyalty, and value alignment between the community and the token economy.

With a total supply of 500,000,000 tokens, \$CZT introduces mechanisms intended to support sustainable growth, including flexible and fixed staking, periodic airdrop rewards, and a burn structure tied to supply or market-cap milestones.

2. Mission

The mission of CZ Terminal Token is to build a transparent and reward-oriented digital asset ecosystem that:

- Encourages long-term holding
- Rewards active community participation
- Provides staking opportunities with flexible user choice
- Supports controlled scarcity through token burns

The project is centered on accessibility, utility, and community alignment.

3. Project Overview

Token Name	CZ Terminal Token
Ticker	\$CZT
Network	BNB Smart Chain (BSC)
Total Supply	500,000,000

\$CZT is designed as a utility and community token with an emphasis on staking, incentives, and ecosystem participation.

4. Tokenomics

Supply Distribution

Allocation	Tokens	%
Liquidity & Market Support	150,000,000	30%
Staking Rewards	100,000,000	20%
Holder Airdrops & Community Rewards	75,000,000	15%
Team & Development	75,000,000	15%
Marketing & Partnerships	50,000,000	10%
Treasury / Reserve	50,000,000	10%
Total Supply	500,000,000	100%

Burn Mechanism

A burn mechanism is integrated into the token model to reduce circulating supply over time. Burns may be triggered after:

- A specified token threshold is reached, or
- A defined market capitalization milestone is achieved.

Holder Rewards

\$CZT may distribute rewards to holders through:

- Airdrops
- Promotional reward events
- Ecosystem-based loyalty incentives

Staking

Flexible Staking	Stake and un-stake with greater liquidity. Suitable for users seeking access to funds while earning rewards.
Fixed Staking	Tokens are locked for a predetermined duration. Typically offers enhanced rewards for longer durations.

5. Utility

The core utilities of \$CZT may include:

- Staking participation
- Eligibility for airdrops
- Holder reward access
- Future ecosystem privileges
- Community incentive programs

As the project expands, additional utility layers may be introduced to strengthen adoption and token demand.

6. Roadmap

Phase 1: Launch

- Token deployment
- Community launch
- Initial branding and awareness
- White paper publication

Phase 2: Utility Rollout

- Flexible staking launch
- Fixed staking launch
- Holder reward program initiation
- First airdrop campaigns

Phase 3: Deflationary Structure

- Burn mechanism activation
- Market cap or threshold-based burn strategy implementation
- Community incentive expansion

Phase 4: Ecosystem Growth

- Additional token utilities
- Community partnerships
- Ongoing staking enhancements
- Long-term token economy development
